SUBJECT INDEX

VOLUME 9 (1970)

Acriflavine, UV action spectra for mutation in *E. coli*, 437
Actinomycin D, effect on Chinese hamster cells progressing from G_2 into metaphase, 524
Aflatoxins, in *N. crassa*, 615
Alkylation, of bacterial DNA, 141
Allium cepa, effect of colchicine on sub-chromatid exchanges, 385
9-Aminoacridine·HCl, induced *ad-3* mutants of *N. crassa*, 183
Arachis hypogaea, diethyl sulphate in, 473
Aspergillus nidulans, barriers in intragenic mitotic crossing-over, 213
—, conidia, effect of 8-methoxypsoralen plus near-UV light, 569
—, UV, sensitive mutants, 579
5-Azacytidine, segment extension and chromatid changes in *V. faba*, 599
5-Azadeoxycytidine, segment extension and chromatid changes in *V. faba*, 599

Bacillus subtilis, alkylation of DNA, 141
—, repairing enzymes in inactivation of transforming DNA, 1
Bacteria, irradiated, macromolecular synthesis in, 434
Bacteriophage, T4, mutagenic effect of 4-nitroquinoline 1-oxide, 134
—, —, mutants unable to exclude gene 56 of T2 from progeny of crosses, 345
N-Benzoyloxy-*N*-methyl-4-aminoazobenzene, bobbed mutations in *D. melanogaster*, 239
Biosatellite II, egg production and embryo lethality for Habrobracon, 91
5-Bromodeoxyuridine, in influence of DNA replication on X-ray sensitivity of bacteria, 561
7-Bromoethyl-12-methyl benz[a]anthracene, bobbed mutations in *D. melanogaster*, 239

Caffeine, in control of respiration by DNA in UV-irradiated *E. coli*, 443
Carcinogen, 4-nitroquinoline 1-oxide, in bacteriophage T4, 134
—, polycyclic aromatic, bobbed mutations in *D. melanogaster*, 239
Chiasma frequency, in wild living, X-irradiated male mice, 137
Chinese hamster, cells, chromosomal aberrations, 117
—, ovary cells progressing from G_2 into metaphase, effect of UV-irradiation, 524
Chloramphenicol, in control of respiration by DNA in UV-irradiated *E. coli*, 443
Chlorophyll mutations, frequency in *T. durum* wheat by radiations and chemicals, 589
Chromosomal aberrations, in Chinese hamster cells, 117
Chromosome, fourth, of *D. melanogaster*, X-ray-induced recombination in, 287, 299
—, rearrangements, in male mice, of X-irradiated premeiotic germ cells, 127
—, sex, loss by X-rays in *D. melanogaster*, 489
—, *Y*, fragments, in *D. melanogaster*, females, 85
—, Y and fourth, coordinate nondisjunction of, in irradiated compound-X female *D. melanogaster*, 307
Colchicine, in root meristem cells of *Vicia faba* and *Allium cepa*, 385
Cyclophosphamid, chromosome aberrations in man, 417

Daunomycin, induced chromosomal aberrations, alterations by inhibitors of protein and DNA synthesis, 607
Deletion formation, spontaneous, in *E. coli* mutants deficient in recombination ability, 155
Diethyl sulphate, alkylation of bacterial DNA, 141
—, chlorophyll mutations in *T. durum*, 589
—, in peanuts, 473
7,12-Dimethyl benz[a]anthracene, bobbed mutations in *D. melanogaster*, 239
Dimethyl sulphate, alkylation of bacterial DNA, 141
—, repairing enzymes in activation of transforming DNA, 1
DNA, control of respiration in UV-irradiated *E. coli*, 443
—, of cultivated cells from patients with scleroderma pigmentosum, repair of X-ray damage, 517
—, donor, in *H. influenzae*, 245
—, non-replicated, UV-damaged, *E. coli*, enhanced efficiency of excision repair, 553
—, repair replication in xeroderma pigmentosum cell strains after UV-irradiation in man, 507
—, replication, influence on X-ray sensitivity of bacteria, 561
—, synthesis, inhibitors of, alterations in daunomycin-induced chromosomal aberrations by, 607
—, —, —, effect on UV-sensitive derivatives of *E. coli*, 149
—, transforming, repairing enzymes in inactivation of, 1

Drosophila melanogaster, bobbed mutations, by polycyclic aromatic carcinogens, 239
—, compound-X female, irradiated, coordinate nondisjunction of Y and fourth chromosomes in, 307
—, crossing-over and mutation, 71
—, effect of irradiations on recessive lethals and translocations in spermatozoa and spermatids, 395
—, effect of storage of ethyleneimine on frequency of translocations, 243
—, female, X-ray-induced recombination in fourth chromosome, 287, 299
—, heterologous interchange at meiosis, 273
—, mosaics induced by ethyl methanesulphonate, 323
—, sex chromosome loss by X-rays, 489
—, *Y* chromosome fragments, 85

Egg production, for Habrobracon from Biosatellite II experiments, 91
Embryo lethality, for Habrobracon from Biosatellite II experiments, 91
Escherichia coli, B/r, repair systems and nitrous acid mutagenesis, 359
—, influence of DNA replication on X-ray sensitivity of, 561
—, K-12, effect of inhibitors of DNA synthesis on UV-sensitive derivatives, 149
—, loss of photoreversibility of UV-induced mutations to tryptophan independence, 349
—, mutants deficient in recombination ability, spontaneous deletion formation, 155
—, photosensitization to near UV light by 8-methoxypsoralen, 21
—, a possible product of a mutator gene, 549
—, UV action spectra for mutation, 437
—, UV-damaged enhanced efficiency of excision repair, 553
—, UV-irradiated, control of respiration by DNA, 443
—, WP2, location of genes controlling excision repair of UV damage and mutator activity, 341
8-Ethoxycaffeine, in root meristem cells of *Vicia faba* and *Allium cepa*, effect of colchicine on, 385
Ethyleneimine, effect of storage on frequency of translocations in *D. melanogaster*, 243
Ethyl iodide, alkylation of bacterial DNA, 141
Ethyl methanesulphonate, alkylation of bacterial DNA, 141
—, chlorophyll mutations in *T. durum*, 589
—, in histidine-3 locus of *N. crassa*, 467
—, mosaics in *D. melanogaster*, 323
Excision repair, of UV damage in *E. coli* DNA, 553
—, of UV damage and mutator activity in *E. coli* WP2, location of genes controlling, 341

Fluorodeoxyuridine, alterations in daunomycin-induced chromosomal aberrations by, 607
m-Fluorophenylalanine, mitotic conversions at *ad-9* gene in *S. pombe*, 41
5-Fluorouracil, in control of respiration by DNA in UV-irradiated *E. coli*, 443
5-Fluorouracil deoxyriboside, effect on UV-sensitive derivatives of *E. coli*, 149
Formaldehyde, crossing-over and mutation in *D. melanogaster*, 71

Gallus domesticus, viral-induced mutagenesis, 425
Genetic classification, of lethal effects of various agents on *Phyco. blakesleeanus*, 369

Habrobracon, egg production and embryo lethality from Biosatellite II experiments, 91
Haemophilus influenzae, donor DNA, 245
Helianthus annuus, X-irradiation response of G_1 cells in dry seeds, 481
Heterologous interchange, in *D. melanogaster* at meiosis, 273
Hydroxylamine, repairing enzymes in inactivation of transforming DNA, 1

ICR-170, in *S. pombe*, 199
ICR-177, *ad-3* mutants of *N. crassa*, 183
Irradiation, near UV, photosensitization in *E. coli* to, by 8-methoxypsoralen, 21
—, near UV and visible light, plus 8-methoxypsoralen, in *A. nidulans* conidia, 569
—, neutron and X, recessive lethals and translocations in spermatozoa and spermatids of *D. melanogaster*, 395
—, response of G_1 cells in dry seeds, 481
—, UV, action spectra for mutation in *E. coli*, 437
—, —, on Chinese hamster cells progressing from G_2 into metaphase, 524
—, —, damaged *E. coli* DNA, enhanced efficiency of excision repair, 553
—, —, in *E. coli*, control of respiration by DNA, 443
—, —, in *E. coli* WP2, location of genes controlling excision repair, 341
—, —, effect of inhibitors of DNA synthesis on UV-sensitive derivatives of *E. coli*, 149
—, —, fate of donor DNA in *H. influenzae*, 245
—, —, in histidine-3 locus of *N. crassa*, 467
—, —, induced mutations to tryptophan independence in *E. coli*, loss of photoreversibility, 349
—, —, macromolecular synthesis in bacteria, 434
—, —, in man, DNA repair replication in xeroderma pigmentosum cell strains, 507
—, —, and *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, petite mutants in *S. cerevisiae*, 193
—, —, mitotic conversions at *ad-9* gene in *S. pombe*, 41
—, —, mutant of *N. crassa*, sensitive to, defective for photoreactivation, 455
—, —, petite mutants of *S. cerevisiae*, 255
—, —, repairing enzymes in inactivation of transforming DNA, 1
—, —, sensitive mutants of *A. nidulans*, 579
—, —, sensitivity in yeast, 31

Irradiation, *(continued)*
—, UV and X, lethal effects on *Phyco. blakesleeanus*, 369
—, —, in *P. aurelia*, 261
—, —, sensitivity of bacteria, influence of DNA replication on, 561
—, X, chromosomal aberrations in Chinese hamster cells, 117
—, —, coordinate nondisjunction of Y and fourth chromosomes in compound-X female *D. melanogaster*, 307
—, —, fast and thermal neutrons, in *T. durum*, 589
—, —, mitotic conversions at *ad-9* gene in *S. pombe*, 41
—, —, in mouse spermatogonia, 407, 411, 501
—, —, paternal, litter size and early postnatal mortality in swine, 337
—, —, radiosensitivity and chiasma frequency in wild living male mice, 137
—, —, recombination in fourth chromosome of *D. melanogaster*, 287, 299
—, —, repair of damage in DNA of cultivated cells from patients with xeroderma pigmentosum, 517
—, —, in segment extension and chromatid changes in *V. faba* after treatment with 5-azacytidine and 5-azadeoxycytidine, 599
—, —, sex chromosome loss in *D. melanogaster*, 489
—, —, translocations in mouse spermatogonia, 219
—, —, whole body and mosaic mutations in silkworm, 109
—, X and ^{60}Co γ, chromosome damage in human blood lymphocytes, 225

Lactuca sativa, X-irradiation response of G_1 cells in dry seeds, 481
Litter size, paternal X-irradiation in swine, 337
Location of genes, controlling excision repair of UV damage and mutator activity in *E. coli* WP2, 341
Lymphocytes, human, cyclophosphamid-induced chromosome aberrations, 417
—, human peripheral blood, radiation-induced chromosome damage, 225

Man, cyclophosphamid-induced chromosome aberrations, 417
—, DNA repair replication in xeroderma pigmentosum cell strains after UV-irradiation, 507
—, leukocytes, alterations in daunomycin-induced chromosomal aberrations by inhibitors of protein and DNA synthesis, 607
—, radiation-induced chromosome damage in blood lymphocytes, 225
—, repair of X-ray damage in DNA of cultivated xeroderma pigmentosum cells, 517
8-Methoxypsoralen, in near UV-irradiated *A. nidulans* conidia, 569
—, photosensitization in *E. coli* to near UV light, by, 21
6-Methylcoumarin, in root meristem cells of *Vicia faba* and *Allium cepa*, effect of colchicine on, 385
Methyl iodide, alkylation of bacterial DNA, 141
Methyl methanesulphonate, alkylation of bacterial DNA, 141
N-Methyl-*N'*-nitro-*N*-nitrosoguanidine, lethal effects on *Phyco. blakesleeanus*, 369
—, in *P. aurelia*, repair processes, 261
—, repairing enzymes in inactivation of transforming DNA, 1
—, in *S. coelicolor*, 167
—, and UV light, petite mutants in *S. cerevisiae*, 193
Mitomycin C, fate of donor DNA in *H. influenzae*, 245
—, repairing enzymes in inactivation of transforming DNA, 1
Mitotic conversions, in *ad-9* gene in *S. pombe*, 41
Mitotic crossing-over, intragenic, barriers in, 213
Mosaics, in *D. melanogaster*, 323
—, by nitrous acid, in *S. pombe*, 59
—, X-ray irradiation in silkworm, 109
Mouse, male, chromosome rearrangements, in X-irradiated premeiotic germ cells, 127
—, spermatogonia, translocations by X-ray doses, 219, 407, 411, 501
—, wild living, male, cytogenetic radiosensitivity and chiasma frequency, 137
Mutagen(s), acriflavine, UV action spectra for mutation in *E. coli*, 437
—, actinomycin D, effect on Chinese hamster cells progressing from G_2 into metaphase, 524
—, aflatoxins, in *N. crassa*, 615
—, 9-aminoacridine·HCl, induced *ad-3* mutants of *N. crassa*, 183
—, 5-azacytidine, segment extension and chromatid changes in *V. faba*, 599
—, 5-azadeoxycytidine, segment extension and chromatid changes in *V. faba*, 599
—, *N*-benzoyloxy-*N*-methyl-4-aminoazobenzene, bobbed mutations in *D. melanogaster*, 239
—, 5-bromodeoxyuridine, in influence of DNA replication on X-ray sensitivity of bacteria, 561
—, 7-bromoethyl-12-methyl benz[a]anthracene, bobbed mutations in *D. melanogaster*, 239
—, caffeine, in control of respiration by DNA in UV-irradiated *E. coli*, 443
—, chloramphenicol, in control of respiration by DNA in UV-irradiated *E. coli*, 443
—, colchicine, in root meristem cells of *Vicia faba* and *Allium cepa*, 385
—, cyclophosphamid, chromosome aberrations in man, 417
—, daunomycin, induced chromosomal aberrations, alterations by inhibitors of protein and DNA synthesis, 607
—, diethyl sulphate, alkylation of bacterial DNA, 141

Mutagen(s), diethyl sulphate, *(continued)*
—, —, chlorophyll mutations in *T. durum*, 589
—, —, in peanuts, 473
—, 7,12-dimethyl benz[a]anthracene, bobbed mutations in *D. melanogaster*, 239
—, dimethyl sulphate, alkylation of bacterial DNA, 141
—, —, repairing enzymes in inactivation of transforming DNA, 1
–, 8-ethoxycaffeine, in root meristem cells of *Vicia faba* and *Allium cepa*, effect of colchicine on, 385
—, ethyleneimine, effect of storage on frequency of translocations in *D. melanogaster*, 243
—, ethyl iodide, alkylation of bacterial DNA, 141
—, ethyl methanesulphonate, alkylation of bacterial DNA, 141
—, —, chlorophyll mutations in *T. durum*, 589
—, —, in histidine-3 locus of *N. crassa*, 467
—, —, mosaics in *D. melanogaster*, 323
—, *m*-fluorophenylalanine, mitotic conversions at *ad-9* gene in *S. pombe*, 41
—, 5-fluorouracil, in control of respiration by DNA in UV-irradiated *E. coli*, 443
—, 5-fluorouracil deoxyriboside, effect on UV-sensitive derivatives of *E. coli*, 149
—, hydroxylamine, repairing enzymes in inactivation of transforming DNA, 1
—, ICR-170, in *S. pombe*, 199
—, ICR-177, *ad-3* mutants of *N-crassa*, 183
—, 8-methoxypsoralen, in near UV-irradiated *A. nidulans* conidia, 569
—, —, photosensitization in *E. coli* to near UV light by, 21
—, 6-methylcoumarin, in root meristem cells of *Vicia faba* and *Allium cepa*, effect in colchicine on, 385
—, methyl iodide, alkylation of bacterial DNA, 141
—, methyl methanesulphonate, alkylation of bacterial DNA, 141
—, *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, lethal effects on *Phyco, blakesleeanus*, 369
—, —, in *P. aurelia*, repair processes, 261
—, —, repairing enzymes in inactivation of transforming DNA, 1
—, —, in *S. coelicolor*, 167
—, —, and UV light, petite mutants in *S. cerevisiae*, 193
—, mitomycin C, fate of donor DNA in *H. influenzae*, 245
—, —, repairing enzymes in inactivation of transforming DNA, 1
—, nalidixic acid, effect on UV-sensitive derivatives of *E. coli*, 149
—, —, loss of photoreversibility of UV-induced mutations to tryptophan independence in *E. coli*, 349
—, nitrogen mustard, in *P. aurelia*, 261
—, 4-nitroquinoline 1-oxide, in bacteriophage T4, 134
—, nitrous acid, complete and mosaic mutations in *S. pombe*, 59
Mutagen(s), nitrous acid, *(continued)*
—, —, in *E. coli* B/r, 359
—, —, in histidine-3 locus of *N. crassa*, 467
—, —, repairing enzymes in inactivation of transforming DNA, 1
—, —, sensitive mutants of *A. nidulans*, 579
—, —, in *S. pombe*, 199
—, pancreatic deoxyribonuclease, repairing enzymes in inactivation of transforming DNA, 1
—, proflavine, in excision repair of UV-damaged *E. coli* DNA, 553
—, propyl iodide, alkylation of bacterial DNA, 141
—, thymine, in influence of DNA replication on X-ray sensitivity of bacteria, 561
—, triethylenemelamine, in *P. aurelia*, 261
Mutant, *ad-3*, of *N. crassa*, induced by ICR-177, 183
—, *ad-6* and *ad-7*, in *S. pombe*, induced by ICR-170, 199
—, *ad-9*, mitotic conversions in *S. pombe*, 41
—, petite, of *S. cerevisiae*, by UV light, 255
—, T2, gene 56, inability of bacteriophage T4 mutants to exclude, from progeny of crosses, 345
—, T4, bacteriophage, unable to exclude gene 56 of T2 from progeny of crosses, 345
Mutation frequencies, tables for statistical significance, 527
Mutator activity, in *E. coli* WP2, location of genes controlling excision repair, 341
Mutator gene, bacterial, a possible product of, 549
Mycotoxins, in *N. crassa*, 615

Nalidixic acid, effect on UV-sensitive derivatives of *E. coli*, 149
—, loss of photoreversibility of UV-induced mutations to tryptophan independence in *E. coli*, 349
Neurospora crassa, ICR-177-induced *ad-3* mutants, 183
—, mutagenicity of aflatoxins, 615
—, nitrous acid in histidine-3 locus, 467
—, UV-sensitive mutant, defective for photoreactivation, 455
Nitrogen mustard, in *P. aurelia*, 261
4-Nitroquinoline 1-oxide, in bacteriophage T4, 134
Nitrous acid, complete and mosaic mutations in *S. pombe*, 59
—, in *E. coli* B/r, 359
—, in histidine-3 locus on *N. crassa*, 467
—, repairing enzymes in activation of transforming DNA, 1
—, sensitive mutants of *A. nidulans*, 579
—, in *S. pombe*, 199
Nondisjunction, coordinate, of Y and fourth chromosomes in irradiated compound-X female *D. melanogaster*, 307

Oocytes, mature, nature of *Y* chromosome fragments in *D. melanogaster*, 85

Pancreatic deoxyribonuclease, repairing enzymes in inactivation of transforming DNA, 1
Paramecium aurelia, *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine in, repair processes, 261
Peanuts, diethyl sulphate in, 473
Petite mutants, in *S. cerevisiae*, by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine and UV light, 193
Phage, T4, in control of respiration by DNA in UV-irradiated *E. coli*, 443
Photoreactivation, a UV-sensitive mutant of *N. crassa* defective for, 455
Photoreversibility, loss of, of UV-induced mutations to tryptophan independence in *E. coli*, 349
Photosensitization, in *E. coli* to near UV light by 8-methoxypsoralen, 21
Phycomyces blakesleeanus, genetic classification of lethal effects of various agents, 369
Pinus pinea, X-irradiation response of G_1 cells in dry seeds, 481
Postnatal mortality, in swine, paternal X-irradiation, 337
Proflavine, in excision repair of UV-damaged *E. coli* DNA, 553
Propyl iodide, alkylation of bacterial DNA, 141
Protein synthesis, inhibitors of, alterations in daunomycin-induced chromosomal aberrations by, 607
Puromycin, alterations in daunomycin-induced chromosomal aberrations by, 607

Recombination, X-ray-induced, in fourth chromosome of *D. melanogaster*, 287, 299
Recombination ability, *E. coli* mutants deficient in, spontaneous deletion formation, 155
Repairing enzymes, in inactivation of transforming DNA, 1
Repair process, *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine in *P. aurelia*, 261
Repair systems, and nitrous acid mutagenesis, in *E. coli*, 359

Saccharomyces cerevisiae, mutations towards UV sensitivity, 31
—, petite mutants, by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine and UV light, 193
—, —, by UV light, 255
Schizosaccharomyces pombe, complete and mosaic mutations, by nitrous acid, 59
—, ICR-170-induced mutations, 199
—, mitotic conversions at *ad-9* gene, 41
Silkworm, X-ray irradiation in, whole body and mosaic mutations, 109
Spermatids, late, of *D. melanogaster*, effect of irradiations on recessive lethals and translocations, 395
Spermatogonia, mouse, translocations by X-ray doses, 219, 407, 411, 501
Spermatozoa, mature, of *D. melanogaster*, effect or irradiations on recessive lethals and translocations, 395
—, —, sex chromosome loss by X-rays, 489
Statistical significance, of mutation frequencies tables, 527
Streptomyces coelicolor, mutagenesis by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 167
Subchromatid exchanges, effect of colchicine on, in *Vicia faba* and *Allium cepa*, 385
Swine, paternal X-irradiation, 337

Tables, for determining statistical significance of mutation frequencies, 527
Thymine, in influence of DNA replication on X-ray sensitivity of bacteria, 561
Triethylenemelamine, in *P. aurelia*, 261
Triticum durum, chlorophyll mutations induced by radiations and chemicals, 589
Tryptophan, independence in *E. coli*, loss of photoreversibility of UV-induced mutations to, 349

Vibration experiments, egg production and embryo lethality for Habrobracon, 91
Vicia faba, effect of colchicine on subchromatid exchanges, 385
—, segment extension and chromatid changes after treatment with 5-azacytidine and 5-azadeoxycytidine, 599
Virus, infectious bronchitis, Newcastle disease and Rous sarcoma, mutagenesis in *Gallus domesticus*, 425

Wheat, *T. durum*, chlorophyll mutations induced by radiations and chemicals, 589

Xeroderma pigmentosum, cell strains, DNA repair replication after UV-irradiation in man, 507
—, repair of X-ray damage in DNA of cultivated cells, 517

Yeast, mutations towards UV sensitivity, 31
—, petite mutants, by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine and UV light, 193
—, —, by UV light, 255
